

OXFORD CENTRE FOR TECHNOLOGY AND DEVELOPMENT

EUROGIA 2024

THE TEAM

WHO ARE WE?

Oxford Centre for Technology and Development (OCTD) is a research, consultancy and technology company, comprising a team of distinguished researchers, experts, and technology consultants that came together to resolve challenges in data and impact.

SERVICES

WHAT DO WE DO?

DATA SCARCITY

Expert in
overcoming data
scarcity in
emerging markets.

A blend of academic and commercial expertise to develop and use advanced methodologies for precise impact assessment and measurement.

Delivering solutions to provide insight into emerging markets and required metrics.

CLIMATE TECH & IMPACT

Creating greater clarity over climate metrics and impact measurement.

Assisting investors and startups in climate tech to measure impact and validate success in facilitating funding for innovations.

Aligning financial flows with net zero pathways to overcome obstacles in funding for innovations.

IMPACT BENCHMARKING

THE PRODUCT

We are building an impact scoring product for investors, financial institutions, and climate tech startups.

The product targets the climate data gap, providing robust solutions for comprehensive insights, measurement, and reporting in climate tech.

Achieving net zero requires more than mitigation: innovations must be scaled so the world becomes adaptable to a changed environment.

“ ”

Our target is to identify the climate data gap to enable more efficient capital allocation into crucial net zero solutions.
