

Knarkz Solutions Limited

(in partnership with IntelliWarmth Technologies Ltd)

LoRaSecureAI is an AI-enhanced, ultra-low power LoRaWAN platform for secure building connectivity. Developed by Knarkz and IntelliWarmth Technologies, it integrates edge AI, privacy-first analytics, and retrofit heating control. Funded by Innovate UK, our aim is to validate across multi-country pilots and scale to commercial readiness in the next 18 months. We're seeking co-applicants, demo sites, and infrastructure partners to join a next-gen smart building ecosystem.
